DataRobot

SUCCESS STORY AT A GLANCE

Australian Schools Boost Student Success,

Reduce Attrition by 13% — with AI

When Catholic Education Diocese of Parramatta (CEDP) sought to mine its wealth of data to enhance student success and operations, it turned to DataRobot Al Cloud for automated machine learning.

Challenge

With 80 schools and 44,500 students across New South Wales, Catholic Education Diocese of Parramatta holds a trove of data on its students, from performance to attendance to demographics. CEDP set out to mine its data to improve student performance and advance operational goals but lacked the internal resources to do so.

Solution

With DataRobot Al Cloud, CEDP applies predictive analytics to improve student achievement, reduce attrition, and spot other opportunities to enhance learning and teaching – and does so without any data scientists.

Results

13% Reduction in the

\$1.2M In retained

94%
Accuracy in predicting student achievement
