Matmut Derives Data Insights
3 Times Faster

Matmut automated its manual predictive analytics process with DataRobot AI Cloud. The French insurance company now confidently applies it to an ambitious list of business challenges with fewer resources and a three times productivity gain.

Challenge

To elevate nearly every area of the company, the Matmut Group relies on data. The major French insurance company set out to replace its manual, code-heavy modeling processes with a single solution that reduced the effort and increased the collaboration between data scientists and the business.

Solution

The Matmut Group deployed DataRobot AI Cloud to automate the end-to-end lifecycle, from data preparation to modeling to monitoring. Now, the company applies AI to numerous areas of its business, including forecasting loan needs, predicting claims volumes, and understanding natural disasters for business planning and pricing.

Results

Triple
the productivity over the previous process

60
The target number of use cases

1
Platform for data scientists, ML engineers, analysts, and actuaries
